

I do not feel the proposal that would lessen Indiana's Telephone Privacy law protection should in any way be revoked. I no longer dread being home because the phone is not ringing constantly while I am trying to relax after work. i used to receive at least 20 or more calls per week, now I rarely receive 1 per week if that. My daughter also on the no call list was able to cancel her privacy manager with the phone company. She has 2 small children and was always receiving calls she did not have time to answer or wake the babies up from their naps. I have the right to say I DO NOT want these calls.
